

DETAILED ACTION

Allowable Subject Matter

1. Claims 1-7 are allowed.
2. The following is an examiner' s statement of reasons for allowance: The prior art, alone or in combination, fails to set forth a process for producing a polysilsesquioxane graft copolymer comprising applying ionizing radiation or heat to a mixture including a polysilsesquioxane having a repeating unit shown by formula (2) wherein said compound having a iniferter group attached and a vinyl compound. Wherein said process produces a polysilsesquioxane having repeat units as shown by formula (1). The closest prior art would be to Oikawa et al (US 7,375,170) which teaches polymerizing a mixture of a polysilsesquioxane and a (meth) acrylate compound (vinyl compound) to obtain a polysilsesquioxane graft copolymer. The primary difference is Oikawa et al teaches adding an iniferter as a separate compound instead as a substituent on the polysilsesquioxane compound.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled " Comments on Statement of Reasons for Allowance."
